Reading Aid

This representation of the questionnaire contains the same informations as the portal paneldata.org.

Q72. Now we would like to know something about you personally. Were you born in Germany?

*This refers to Germany or the Federal Republic of Germany or the German Democratic Republic in the national borders at the time of your birth.*

- Yes [ ]
- No [ ]
- No answer [-1]

Q72;lst1 bio l0013 born in Germany

Q73. What country were you born in?

*Please enter the current name!*

Q73;lst2 bio l0016 Country Of Birth

Here, in addition to the question number, question text, interviewer instructions, and answer options, you find printed in green the file name and the variable name with the variable label, which contains information from the question. If you see rows of green lines below the answer option, the questionnaire defines several variables or informations are stored in more than one data set. The routing by filters is depicted in blue. Each variable is preceded by an identifier (which generally contains the question number, marked here with a yellow dotted line), which is given, if the variable is used in filters in a subsequent question. Such filters are usually shown (as gatekeepers) at the beginning of the question.

This reading aid does not cover a few exceptional cases: If the filter (as gatekeeper) only affects one of several variables for a question, the filter is printed in blue behind the variable. There you will also find a "go to" command in the form 2 @ Q73. Here, the questionnaire skips to question 73 if the variable results in value of 2.

Phrases that are not already translated in English are displayed in German and preceded by [de].

Is the respondent the head of household, the person who answers the questions about the household?

The questions on the household should be answered by the person who knows most about the concerns of the total household and the other household members.

Important Note: The questions on the household have to be filled out once for each household. Without this question part all other questions would be useless for data analysis!

T2610: Now we have a little exercise which you can do by yourself on the computer. We want to study how the attention and ability to concentrate differs among people. These are important abilities since there are more and more distractions in the modern world. Persons who get distracted less easily, are potentially better to learn or to solve tasks. At the next page we will explain the exercise in detail. Please read the text carefully and take as much time for the response as you need. If you have any questions, I am happy to answer them.

T2611: Now you will see a short movie. In this movie rectangles and circles will move within a rectangle frame. Some of the forms are white, some are black.
